PROFILE

Software engineer, IT professional and Assistant Lecturer with experience developing web applications, supporting technology operations and delivering technical education. Combines practical software development with project experience in authentication, access control and application security. Brings problem-solving, technical documentation and collaboration skills gained across public safety, healthcare and nonprofit organisations. Currently completing an MSc in Cyber Security, with coursework completed and thesis in progress.

TECHNICAL EXPERTISE

Development: C#, Python, JavaScript, ASP.NET Core MVC, EF Core, SQL Server, MySQL, HTML, CSS, Bootstrap; React, Node.js and Express through projects.

Application security: ASP.NET Core Identity, roles and permissions, JWT, TOTP, bcrypt, input validation and file upload validation.

Engineering and tools: Clean Architecture, N-tier architecture, repositories, Unit of Work, Git, Visual Studio, Windows and Linux administration.

SELECTED CLIENT WORK

Hadum Dictionary

Client project | Source code delivered | ASP.NET Core MVC, EF Core, SQL Server

- Built word and article submissions, administrator review, notifications and role-based access for a client dictionary platform.
- Added image and pronunciation uploads, contributor scoring and a picture-word game.

WHEEI Website

Client project for an NGO | C#, ASP.NET Core MVC, Entity Framework Core

- Developed an NGO website with public information pages, a contact form and content management; added role-restricted gallery uploads and deletion in the updated application.

PERSONAL AND ACADEMIC PROJECTS

CoreForge Web Application Starter Kit

Personal development project | C#, ASP.NET Core, SQL Server

- Built a layered starter kit with identity, roles and permissions, CRUD modules and logging; added upload size, extension and binary signature checks.

Multi Factor Authentication Demo

Academic demonstration | React, Node.js, Express | View project

- Built a local authentication prototype with bcrypt, JWT access and refresh tokens, TOTP, email OTP, recovery codes, input validation and rate limits.

Password Strength Checker

Personal project | C#, ASP.NET Core, Bootstrap | View project

- Built interactive password checks with regular expressions, dictionary matching, strength scores and practical improvement suggestions.

PROFESSIONAL EXPERIENCE

Assistant Lecturer

Kaduna Polytechnic | Department of Computer Science | Oct 2026 - Present

- Deliver lectures and practical activities in computing, basic computer networks, artificial intelligence and desktop publishing.
- Develop assessments and teaching materials, using subject-specific examples for students in non-computing departments.
- Supervise ND2 projects and guide students through project scope, technical documentation and implementation.

Assistant Route Commander

Federal Road Safety Corps | RS1.29 KMC Unit Command, Kano | Oct 2023 - Nov 2025

- Coordinated IT activities and supervised IT staff supporting unit operations and reporting.
- Compiled daily through annual reports and prepared administrative correspondence and meeting records for management.
- Supported road safety education, information sharing and field operations.

Scientific Officer

Federal Medical Center, Nguru | Feb 2023 - Jun 2023

- Processed laboratory test results in the Hospital Management System and maintained accurate records for clinical teams.
- Supported communication between laboratory and clinical staff to facilitate timely sharing of results.

ICT Services Intern

eHealth Africa | Apr 2022 - Sep 2022

- Supported Windows Server and Linux administration and integrated staff laptops into the organisational IT domain.
- Assisted with equipment decommissioning and IT asset lifecycle activities across organisational locations.

Technology and Development Volunteer

Society for Women Development and Empowerment | Sep 2021 - Apr 2022

- Supported internal application improvements and project planning for community development and women empowerment programmes.

EDUCATION

MSc Cyber Security

Bayero University Kano | July 2025 - Present

- Current GPA: 4.25/5.00 | Coursework completed | Thesis in progress

BSc Software Engineering

American University of Nigeria | January 2014 - May 2018

- CGPA: 3.25/4.00

PROFESSIONAL STRENGTHS

Technical instruction and mentoring · Staff coordination · Report preparation · Cross-department communication
